

Verlagerung der Ladewagenproduktion an den Standort Wolfenbüttel

Marktoberdorf, 19.11.2021. Der Landtechnikhersteller AGCO/Fendt verkündet, dass die Produktion und Entwicklung der Fendt Ladewagen innerhalb Deutschlands vom Standort Waldstetten an den Produktionsstandort Wolfenbüttel verlagert wird. Damit soll langfristig das Angebot im Bereich Futtererntetechnik für professionelle Landwirte und Lohnunternehmer ausgebaut werden.

Um die Kompetenz für Futtererntetechnik am bisherigen Produktionsstandort für Rundballenpressen weiter zu stärken und gleichzeitig eine höhere Kosteneffizienz zu erzielen, werden ab September 2022 auch die Fendt Ladewagen im niedersächsischen Wolfenbüttel produziert werden.

„Die Entscheidung, die Produktion der Fendt Ladewagen am Standort Wolfenbüttel zu bündeln, ist ein unternehmerischer Entschluss, um unsere Maschinen zur Grünfütterbergung weiter zu professionalisieren. Wir wollen langfristig eine hervorragende Qualität der Fendt Tigos in Design und Verarbeitung gewährleisten“, so Christoph Gröblichhoff, Vorsitzender der AGCO/Fendt Geschäftsführung. „In den kommenden Jahren investieren wir sowohl in die Entwicklung der Futtererntetechnik, als auch in die Fertigung der Fendt Produkte. Unser Standort Wolfenbüttel eignet sich durch Größe und Struktur für einen weiteren Ausbau der Produktionskapazitäten. Wir erwarten in Zukunft noch stärkere Synergien, die durch die Zusammenarbeit der Entwicklungsspezialisten für Ballenpressen und Ladewagen entstehen werden.“

Über Fendt

Fendt ist die führende High-Tech-Marke im AGCO Konzern für Kunden mit den höchsten Ansprüchen an die Qualität von Maschinen und Services. Fendt Traktoren und Erntemaschinen arbeiten global auf professionellen landwirtschaftlichen Betrieben und auch in außerlandwirtschaftlichen Aufgabengebieten. Kunden profitieren von der innovativen Technik zur Erhöhung der Leistung, Effizienz und Wirtschaftlichkeit. Der Einsatz ressourcenschonender Fendt Technologien unterstützt Landwirte und Lohnunternehmer, weltweit nachhaltig zu arbeiten. An den deutschen Standorten Marktoberdorf, Asbach-Bäumenheim, Hohenmölsen, Feucht, Waldstetten und Wolfenbüttel beschäftigt AGCO rund 6.100 Mitarbeiter in den Bereichen Forschung und Entwicklung, Vertrieb und Marketing sowie Produktion, Service und Verwaltung. www.fendt.com, www.fendt.tv, www.facebook.com/fendtgloba1, www.youtube.com/FendtTV, <https://www.instagram.com/fendt.global/>

Über AGCO

AGCO (NYSE:AGCO) ist ein weltweit führendes Unternehmen in der Entwicklung, der Herstellung und dem

Vertrieb von technischen Lösungen für die Agrarwirtschaft. Finanzmeldungen haben auf Twitter folgenden Hashtag #AGCOIR.

Safe Harbor Statement

Statements that are not historical facts, including the projections of earnings per share, sales, industry demand, market conditions, world population, biofuel use and protein consumption, currency translation, farm income levels, margin levels, industry inventory levels, investments in product and technology development, cost reduction initiatives, production volumes, and general economic conditions, are forward-looking and subject to risks that could cause actual results to differ materially from those suggested by the statements. The following are among the factors that could cause actual results to differ materially from the results discussed in or implied by the forward-looking statements.

- Our financial results depend entirely upon the agricultural industry, and factors that adversely affect the agricultural industry generally, including declines in the general economy, increases in farm input costs, lower commodity prices, lower farm income and changes in the availability of credit for our retail customers, will adversely affect us.
- A majority of our sales and manufacturing take place outside the United States, and, many of our sales involve products that are manufactured in one country and sold in a different country, and as a result, we are exposed to risks related to foreign laws, taxes and tariffs, trade restrictions, economic conditions, labor supply and relations, political conditions and governmental policies. These risks may delay or reduce our realization of value from our international operations. Among these risks are the uncertain consequences of Brexit, Russian sanctions and tariffs imposed on exports to and imports from China.
- Most retail sales of the products that we manufacture are financed, either by our joint ventures with Rabobank or by a bank or other private lender. Our joint ventures with Rabobank, which are controlled by Rabobank and are dependent upon Rabobank for financing as well, finance approximately 40% to 50% of the retail sales of our tractors and combines in the markets where the joint ventures operate. Any difficulty by Rabobank to continue to provide that financing, or any business decision by Rabobank as the controlling member not to fund the business or particular aspects of it (for example, a particular country or region), would require the joint ventures to find other sources of financing (which may be difficult to obtain), or us to find another source of retail financing for our customers, or our customers would be required to utilize other retail financing providers. As a result of the recent economic downturn, financing for capital equipment purchases generally has become more difficult in certain regions and in some cases, can be expensive to obtain. To the extent that financing is not available or available only at unattractive prices, our sales would be negatively impacted.
- Both AGCO and our finance joint ventures have substantial account receivables from dealers and end customers, and we would be adversely impacted if the collectability of these receivables was not consistent with historical experience; this collectability is dependent upon the financial strength of the

farm industry, which in turn is dependent upon the general economy and commodity prices, as well as several of the other factors listed in this section.

- We have experienced substantial and sustained volatility with respect to currency exchange rate and interest rate changes, which can adversely affect our reported results of operations and the competitiveness of our products.
- Our success depends on the introduction of new products, particularly engines that comply with emission requirements, which requires substantial expenditures.
- Our production levels and capacity constraints at our facilities, including those resulting from plant expansions and systems upgrades at our manufacturing facilities, could adversely affect our results.
- Our expansion plans in emerging markets, including establishing a greater manufacturing and marketing presence and growing our use of component suppliers, could entail significant risks.
- Our business increasingly is subject to regulations relating to privacy and data protection, and if we violate any of those regulations or otherwise are the victim of a cyber attack, we could incur significant losses and liability.
- We depend on suppliers for components, parts and raw materials for our products, and any failure by our suppliers to provide products as needed, or by us to promptly address supplier issues, will adversely impact our ability to timely and efficiently manufacture and sell products. We also are subject to raw material price fluctuations, which can adversely affect our manufacturing costs.
- We face significant competition, and if we are unable to compete successfully against other agricultural equipment manufacturers, we would lose customers and our net sales and profitability would decline.
- We have a substantial amount of indebtedness, and, as a result, we are subject to certain restrictive covenants and payment obligations that may adversely affect our ability to operate and expand our business.

Further information concerning these and other factors is included in AGCO's filings with the Securities and Exchange Commission, including its Form 10-K for the year ended December 31, 2018 and subsequent Form 10-Qs. AGCO disclaims any obligation to update any forward-looking statements except as required by law.
